

Hospitality Solutions

Combining the Best in Lodging and Call Accounting Technology

INN-FORM XL
Hardware-based call accounting system

For more than 25 years the *INN-FORM XL* has been the most popular call accounting system available. With several models to choose from, the *INN-FORM XL* allows users to generate reports, monitor alarms and alerts, and manage telephone costs. The hospitality industry finds the *INN-FORM XL* easy to use, cost effective, reliable, and accurate.

INN-FORM Plus
Hardware-based call accounting system

The *INN-FORM Plus*, the big brother to the *INN-FORM XL*, is the ideal call accounting system for any organization that must track the call activity for short-term users, as well as store and report calls for long-term users and/or administrative departments. Designed with simplicity and flexibility in mind, the *INN-FORM Plus* can be interfaced with any Property Management System, as well as store up to 60,000 call records in its on memory. With the *INN-FORM Plus*, you can customize departments, generate reports, monitor alarms and alerts, and manage telephone costs.

INN-FORM PC
Software-based call accounting system

The *INN-FORM PC* is the ideal PC based call accounting system for any hotel or lodging facility. The *INN-FORM PC* allows you to print reports to a network or virtual printer, print audit trails to a dot matrix serial printer, and be interfaced with your property management system. The outstanding capabilities of the *INN-FORM PC* will enable you to maximize telephone revenue for your facility, while managing costs at the same time .

TEL electronics, inc. has been the leader in call accounting technology for almost 30 years. *TEL* can help your property or business manage expenses, capture revenue, allocate costs, charge or bill for phone use, plan for future telephone needs, and increase overall business productivity.
