

INN-FORM PC v1.3

Hotel Call Accounting Software:

The INN-FORM PC is a popular and inexpensive call accounting system used by many hotels and resorts. This Window-based call accounting software provides flexible and accurate guest billing, phone call tracking, and telecom management options for hotel managers and staff.

Custom markups and surcharges can be changed on site, along with PMS or PBX changes. The INN-FORM PC interfaces with most Property Management Systems (PMS) and to all major hotel PBX systems. It was designed to imitate the features of the INN-FORM Plus call accounting system, but in an easy-to-use software format.

Product Features:

- Flexible onsite phone system and property management system interfaces
- Runs on a server with the Property Management System (PMS) or on a local PC
- 35 types of call charges with percentage cost adjustments
- Change/add department, cost center, and trunk codes
- Audit, check out, extension, and trunk reports
- Call processing, PMS interface, and report modules

Minimum Requirements:

- Windows 98/2000/XP or Windows 2000/XP Server
- 10 MB free hard drive space, with 40 MB preferred
- 16 MB of RAM. More may be required for non-dedicated system running multiple applications
- IFPC CP requires one serial port for SMDR in from PBX
- IFPC PM requires one serial port for call record out to PMS
- Remote access requires modem
- Attached or networked printer for report output
- Customized rates available upon request.
